- Ask students to extend the pattern beyond the given sequence.
- Use Unifix cubes to build the extended pattern, promoting hands-on engagement.

3. Creating Original Patterns

Encourage creativity and deeper understanding by having students design their own patterns.

- Use a blank template or one with partially completed sequences.
- Students select colors and arrange Unifix cubes to create unique patterns.
- Share and discuss their patterns with peers, explaining the sequence.

4. Pattern Sorting and Categorization

Help students recognize different pattern types through sorting activities.

- Present various pattern templates, each representing different pattern types (AB, ABC, AAB, etc.).
- Students use Unifix cubes to build patterns matching each template.
- Sort the patterns into groups based on their structure, reinforcing pattern recognition skills.

5. Incorporating Colors and Shapes

Enhance pattern complexity by integrating multiple attributes.
